

**Manager's Report**  
**July 1, 2021**

1. Attended in-house kick-off meeting with Crisis-Tec, our Training, Exercise & Consulting firm for our Emergency Operations Plan, Continuity of Operations, and Debris Management Plan policies. These guys are very sharp in their overall knowledge on Crisis preparation. I look forward to working and learning from them.
2. We are contracting with a Personal Trainer to schedule classes with all interested employees to learn more about their physical fitness. Very impressed with the initial meeting. This is being funded by our new Health Insurance carrier, BCBS. This is part of our wellness initiative. We will have other nutritional events throughout the year.
3. Participated in the 6-hour National Town Builders Association charette held on June 10 at Town Hall, Camp Butner Room. Mike Ciriello pulled off an outstanding group of individuals who know more about Town development than anyone I have ever met. This session was extremely intense about Butner's future potential. Mike and I had a follow up on Monday with the Chair of this organization. They are willing to help us along this journey. More on this later!
4. Attended former Councilman Bill Birdsong's visitation. Mr. Birdsong was very passionate about Butner and SGWASA. It's always an honor and privilege to work with the Bill Birdsongs of the world.
5. Working with developer to get everything in line to take over the streets and sidewalks at the Meadows Subdivision.
6. Still working with the West Lyon Station ROW purchases with NCDOT.
7. Working with NCDOT on installing another crosswalk on East Lyon Station Road for AMT Industries.
8. Met with the Mayor and Scott Schroyer.
