DAM TOP & SLOPES / FACES	PRINCIPAL & WQ SPILLWAYS
DAM TOP & SLOPES / FACES Remove trash & high bushes.	Clear obstructed water quality hole or riser.
DAM TOP & SLOPES / FACES Remove trash & high bushes. Repair (applicable problems circled): holes, slides,	Clear obstructed water quality hole or riser. Repair riser/barrel (applicable problems circled): leaking, cracked,
DAM TOP & SLOPES / FACES Remove trash & high bushes. Repair (applicable problems circled): holes, slides, depressions, cracks.	Clear obstructed water quality hole or riser. Repair riser/barrel (applicable problems circled): leaking, cracked, deteriorated, collapsed, damaged.
DAM TOP & SLOPES / FACES Remove trash & high bushes. Repair (applicable problems circled): holes, slides, depressions, cracks. Evidence of (applicable problems circled): seepage,	Clear obstructed water quality hole or riser. Repair riser/barrel (applicable problems circled): leaking, cracked, deteriorated, collapsed, damaged. Repair concrete spillway (applicable problems circled): leaking,
DAM TOP & SLOPES / FACES Remove trash & high bushes. Repair (applicable problems circled): holes, slides, depressions, cracks. Evidence of (applicable problems circled): seepage, overtopping.	Clear obstructed water quality hole or riser. Repair riser/barrel (applicable problems circled): leaking, cracked, deteriorated, collapsed, damaged. Repair concrete spillway (applicable problems circled): leaking, cracked, deteriorated, spalling, damaged.
DAM TOP & SLOPES / FACES Remove trash & high bushes. Repair (applicable problems circled): holes, slides, depressions, cracks. Evidence of (applicable problems circled): seepage, overtopping. Repair eroded areas.	Clear obstructed water quality hole or riser. Repair riser/barrel (applicable problems circled): leaking, cracked, deteriorated, collapsed, damaged. Repair concrete spillway (applicable problems circled): leaking, cracked, deteriorated, spalling, damaged. Outlet end of barrel is eroded or blocked.
DAM TOP & SLOPES / FACES Remove trash & high bushes. Repair (applicable problems circled): holes, slides, depressions, cracks. Evidence of (applicable problems circled): seepage, overtopping.	Clear obstructed water quality hole or riser. Repair riser/barrel (applicable problems circled): leaking, cracked, deteriorated, collapsed, damaged. Repair concrete spillway (applicable problems circled): leaking, cracked, deteriorated, spalling, damaged.
DAM TOP & SLOPES / FACES Remove trash & high bushes. Repair (applicable problems circled): holes, slides, depressions, cracks. Evidence of (applicable problems circled): seepage, overtopping. Repair eroded areas. Seed bare areas.	Clear obstructed water quality hole or riser. Repair riser/barrel (applicable problems circled): leaking, cracked, deteriorated, collapsed, damaged. Repair concrete spillway (applicable problems circled): leaking, cracked, deteriorated, spalling, damaged. Outlet end of barrel is eroded or blocked. Filter rock is clogged.
DAM TOP & SLOPES / FACES Remove trash & high bushes. Repair (applicable problems circled): holes, slides, depressions, cracks. Evidence of (applicable problems circled): seepage, overtopping. Repair eroded areas. Seed bare areas. EMERGENCY SPILLWAY	Clear obstructed water quality hole or riser. Repair riser/barrel (applicable problems circled): leaking, cracked, deteriorated, collapsed, damaged. Repair concrete spillway (applicable problems circled): leaking, cracked, deteriorated, spalling, damaged. Outlet end of barrel is eroded or blocked. Filter rock is clogged. IMPOUNDMENT
DAM TOP & SLOPES / FACES Remove trash & high bushes. Repair (applicable problems circled): holes, slides, depressions, cracks. Evidence of (applicable problems circled): seepage, overtopping. Repair eroded areas. Seed bare areas. EMERGENCY SPILLWAY Remove trees and high bushes.	Clear obstructed water quality hole or riser. Repair riser/barrel (applicable problems circled): leaking, cracked, deteriorated, collapsed, damaged. Repair concrete spillway (applicable problems circled): leaking, cracked, deteriorated, spalling, damaged. Outlet end of barrel is eroded or blocked. Filter rock is clogged. IMPOUNDMENT Repair eroded inlet channel and/or drains.
DAM TOP & SLOPES / FACES Remove trash & high bushes. Repair (applicable problems circled): holes, slides, depressions, cracks. Evidence of (applicable problems circled): seepage, overtopping. Repair eroded areas. Seed bare areas. EMERGENCY SPILLWAY Remove trees and high bushes. Repair eroded areas.	Clear obstructed water quality hole or riser. Repair riser/barrel (applicable problems circled): leaking, cracked, deteriorated, collapsed, damaged. Repair concrete spillway (applicable problems circled): leaking, cracked, deteriorated, spalling, damaged. Outlet end of barrel is eroded or blocked. Filter rock is clogged. IMPOUNDMENT Repair eroded inlet channel and/or drains. Repair eroded slopes.
DAM TOP & SLOPES / FACES Remove trash & high bushes. Repair (applicable problems circled): holes, slides, depressions, cracks. Evidence of (applicable problems circled): seepage, overtopping. Repair eroded areas. Seed bare areas. EMERGENCY SPILLWAY Remove trees and high bushes. Repair eroded areas. Seed bare areas.	Clear obstructed water quality hole or riser. Repair riser/barrel (applicable problems circled): leaking, cracked, deteriorated, collapsed, damaged. Repair concrete spillway (applicable problems circled): leaking, cracked, deteriorated, spalling, damaged. Outlet end of barrel is eroded or blocked. Filter rock is clogged. IMPOUNDMENT Repair eroded inlet channel and/or drains. Repair eroded slopes. Clean sediment from forebay area.
DAM TOP & SLOPES / FACES Remove trash & high bushes. Repair (applicable problems circled): holes, slides, depressions, cracks. Evidence of (applicable problems circled): seepage, overtopping. Repair eroded areas. Seed bare areas. EMERGENCY SPILLWAY Remove trees and high bushes. Repair eroded areas. Seed bare areas. Repair displaced rip-rap.	Clear obstructed water quality hole or riser. Repair riser/barrel (applicable problems circled): leaking, cracked, deteriorated, collapsed, damaged. Repair concrete spillway (applicable problems circled): leaking, cracked, deteriorated, spalling, damaged. Outlet end of barrel is eroded or blocked. Filter rock is clogged. IMPOUNDMENT Repair eroded inlet channel and/or drains. Repair eroded slopes. Clean sediment from forebay area. Permanent pool less than 3 feet. Perform pond volume check.
DAM TOP & SLOPES / FACES Remove trash & high bushes. Repair (applicable problems circled): holes, slides, depressions, cracks. Evidence of (applicable problems circled): seepage, overtopping. Repair eroded areas. Seed bare areas. EMERGENCY SPILLWAY Remove trees and high bushes. Repair eroded areas. Seed bare areas. Repair displaced rip-rap. Remove obstructions from spillway.	Clear obstructed water quality hole or riser. Repair riser/barrel (applicable problems circled): leaking, cracked, deteriorated, collapsed, damaged. Repair concrete spillway (applicable problems circled): leaking, cracked, deteriorated, spalling, damaged. Outlet end of barrel is eroded or blocked. Filter rock is clogged. IMPOUNDMENT Repair eroded inlet channel and/or drains. Repair eroded slopes. Clean sediment from forebay area.
DAM TOP & SLOPES / FACES Remove trash & high bushes. Repair (applicable problems circled): holes, slides, depressions, cracks. Evidence of (applicable problems circled): seepage, overtopping.
