

Save our Water by Preventing

Stormwater Pollution

Where it Comes From

Where it Goes

When rain or water hit hard surfaces like pavement, it creates stormwater runoff.

What You Can Do!

This pollution is not treated or removed from the water on its journey, so it is up to each of us to keep it clean and fresh from the start. Here are some things we can all do to prevent stormwater pollution and keep our communities looking and feeling great!

This stormwater picks up lots of nasty pollution as it is carried directly through gutters and drains out to the rivers, streams, and lakes that hold our drinking water, making them toxic and unsafe for people and animals.

But it doesn't have to end up this way!

- ✓ Dispose of properly!
- ✓ Follow the directions!

- ✓ Mulch 'em!
- ✓ Scoop poop!
- ✓ Pick up litter!
- ✓ Clean spills promptly!

If each of us makes some small changes, we can make sure our waters are clean and our environment is healthy for all of us!
